“Dr. Schwarcz . . . has a knack for translating science into a language that anyone can understand and actually enjoy.”

—*The Toronto Sun on Let Them Eat Flax!*

From the author of 14 bestselling books including *The Right Chemistry* and *Brain Fuel*

Monkeys, Myths, and Molecules

Separating Fact from Fiction, and the Science of Everyday Life

By Dr. Joe Schwarcz

Thanks to the internet, we all have unprecedented access to information. Never before in human history has the average person been able to find answers with such ease. Unfortunately, with this wealth of information comes misinformation—the web is a hotbed of half-baked theories, pseudoscientific speculations, and poorly drawn conclusions.

Monkeys, Myths, and Molecules is the latest book from notorious debunker **Dr. Joe Schwarcz**. In his latest book, Dr. Schwarcz looks critically at myths surrounding canned food, artificial dyes, SPF, homeopathy, cancer, and more. He even takes on the Food Babe! Dr. Schwarcz offers readers a scientific approach to hotbutton issues. Anyone looking for an antidote media misinformation will be grateful for his clarity, rationality, and humour.

Dr. Joe Schwarcz is a director of McGill University’s Office for Science and Society and the author of 13 bestselling books. Well known for his informative and entertaining lectures, Dr. Schwarcz has received numerous awards for teaching and deciphering science for the public. He is the host of the radio program *The Dr. Joe Show* and has appeared hundreds of times on television. He lives in Montreal, Quebec.
